

República de Moçambique
Presidência da República
O Presidente

Maputo, 29th October 2012

We, the People of Mozambique, call upon all the nations of the World to continue striving for peace, security and development of the Humankind. We say never again should we or the generations to come experience wanton killings, massive destructions and displacements of people. We say the world should be a place where we live with dignity, free from poverty and where everyone of us finds room and encouragement to create and to enjoy the social and economic development the human mind is capable of.

The President of Republic

Armando Emilio Guebuza
